SCARLET

Screens Barred Gaze of
the Curious

As King Edward Was Taken to
Royal Yacht.

London, July 15.—King Edward left Victoria station for Portsmouth, where he will be placed on the royal yacht, aboard the royal special at 11:35 o'clock this morning. The time of his majesty's departure was kept secret. A few workmen planing the platform of the railroad station in order that the King's passage might be smoother, was the only sign that anything unusual was about to happen. At 11 o'clock the station was cleared. The King was brought in a large two-horse closed ambulance. Big scarlet screens were placed between the ambulance and the train, so that nobody except the doctors and the immediate attendants saw his majesty as he was carried on a flat couch into the double doored railway carriage.

When the King was safely aboard the train which consisted of six carriages, it immediately drew out. Heavy curtains were hung over the windows and doors, obscuring the interior of the train and also shielding the glaring light from the royal patient.

Portsmouth, Eng., July 15.—The royal train with King Edward aboard, arrived here shortly before 2 o'clock this afternoon. The train ran to the end of the pier, which was closed to the public. At 2 o'clock the King embarked on the royal yacht Victoria and Albert. The yacht will go direct to Cowes, where she will anchor.

The weather is hot, but the sea is calm and in ideal condition for a quiet cruise for the King.

Barberton Solons Wait-
ed Very Wisely

And Passed a Certain Ordinance
When He Was Gone.

(Special Correspondence.)

Barberton, July 15.—The astuteness of the Barberton City Council is equal to the craft attributed to Brer Rabbit, in the fable, and a typical exposition of the foxiness of the City Fathers was given at the Council meeting, Monday night, when a certain disputed measure was carried through in a cleverly diplomatic manner.

Some time ago, an ordinance authorizing the city to borrow \$7110.95 from Mr. James T. Sneddon, to pay the city's share of the street paving, was presented to the Council and passed its first reading. Mr. McCarty, was strenuously opposed to the measure and fought it with all his usual impetuosity.

The friends of the measure bided their time, and, by a clever ruse, succeeded in securing the adoption of the ordinance, under a suspension of the rules on Monday night. Mr. McCarty employment will not allow him to remain at the Council meeting later than 10 o'clock, so other matters were brought up and dalled over until nearly 10 o'clock, when Mr. McCarty asked to be excused. No inkling had been given of the intention to bring up the ordinance to borrow money but it was brought up at this point, and, in the absence of Mr. McCarty, the only member really opposed to the measure, was carried through in short order.

Had this measure not been taken it is probable that work on the Tuscumna was aye, paving would have been discontinued until the money to pay the contractors was forthcoming.

CARPENTER

And Electrician Quar-
relled Over Tools.

George Aitken is an electrician and Frank Connolly is a boss carpenter. Salt Co., and both wanted to use a certain block and tackle for certain work, Saturday.

Now neither seemed to desire to relinquish his claim to the apparatus, and the difference of opinion led to an exchange of verbal artillery, which then led to a fight between the two and the arrest of Connolly, who was charged by Aitken with having assaulted him. The case was threshed out in Police court Tuesday morning, and Connolly was fined \$5 and costs.

CORN PRICE

FELL FAST

Chicago, July 15.—Over 11½ cents loss within an hour was the record made by July corn on the Board of Trade this morning. It was the most remarkable drop recorded in years, but, strangely, the decline was not attended by any unusual excitement. Heavy shipments to Chicago are responsible for the slump.

Before noon, the price had gone to 67 and at 12 o'clock to 65½.

HORSE TRAINER.

Prof. Gleason Has Some Bad
Ones to Handle.

Tonight at Lakeside park, Prof. Gleason's performance opens for one week. Agents have been here for one week booking and getting bad horses for Prof. Gleason's use on this night. The first horse is a nervous one, which will not stand at any noise but when Prof. Gleason gets through with him he will be like a kitten. The next two are runaways and generally bad and will do damage when left alone. Prof. Gleason will take two animals and drive them to steam whistles and flying paper and over exploding fire crackers. Prof. Gleason can look a horse in the eye and the animal will follow him like a trained dog. There are two bronchos to be handled with the rest of these horses. The last horse is a wicked kicker. Then the fun will begin when Prof. Gleason takes this fellow in hand.

The doors for the performance will open at 7:30 and the show begins at 8:15. The street railroads have made arrangements to run extra cars.
